

Galaxy Buds3

Price: Rs. 56,699.00 (Buy now and save up to 30% off on Buds 3)

Features

- **Galaxy AI is here** Galaxy AI is here for your all-new Galaxy Buds3. Discover the details in your favorite songs. Re-engineered with an angled design to bring sound closer to your ears. Feel the beat with a new 11mm speaker for strong, dynamic sound. Hear the distinct timbre and clarity in each note with 24-bit CODEC, giving you the ultimate Hi-Fi sound experience. Fine-tune the details with Galaxy AI enhancements for ANC and real-time translation that give you an edge. Interpreter requires Samsung Account login. Certain languages may require language pack download. Service availability may vary by language. Accuracy of results is not guaranteed. Availability and supported features may vary by country, region or carrier. Availability of supported languages may vary. Images simulated for illustrative purposes. Sequences shortened and simulated. Actual UI may be different. Audio interpretation is only available when wearing Galaxy Buds and connected to a Samsung Galaxy smartphone. Interpreter feature is not directly provided by Galaxy Buds themselves. If Galaxy Buds are unavailable, the interpreted content is provided on the screen of your Samsung Galaxy smartphone.
- **Secure fit for sensational sound** Re-imagined design, engineered for incomparable sound. Feel the difference with our all-new, open-type earbuds with a snug, angled fit to seal in sound. Images simulated for illustrative purposes. Available colors may vary by country or carrier.
- **Ergonomically engineered for easy listening** Our new angular design has been meticulously crafted based on 3D ear data collected from a computational design tool to check for wearability. It's made to optimize sound and minimize ear canal pressure, making it ideal for day-to-day wear. Images simulated for illustrative purposes.
- **Change it up with just a touch** Leave your phone in your pocket and conveniently control your earbuds by using simple gestures. Even with a swift swipe, rest assured your Galaxy Buds3 stay securely in your ears. Swipe up/down the Blade to adjust the volume. Pinch to play and pause, or pinch and hold to change noise control or to launch your favorite app. Images simulated for illustrative purposes.
- **Bring the beat in** Equipped with a new 11mm speaker with a 1.5x amplitude enhanced diaphragm, step up your sound and go from dull to dynamic. Images simulated for illustrative purposes.
- **Hi-Fi sound that hits different** Retain ultra high-quality audio from the recording studio to your Galaxy Buds3. The Samsung Seamless Codec compresses and encodes up to 24bit / 96kHz audio. Then, decodes on the Galaxy Buds3, maintaining the 24bit / 96kHz, high-fidelity sound so you can hear the intricate details, just as it was intended. Images simulated for illustrative purposes. Ultra High-Quality Audio up to 24bit / 96kHz is available on Galaxy S24 series, Galaxy S23 series, Galaxy Z Fold6, Galaxy Z Flip6, Galaxy Z Fold5, Galaxy Z Flip5 and Galaxy Tab S9 series with One UI 6.1.1 or above. Additional devices may be supported in the future.
- **Galaxy AI makes music enjoyable for any ear** Delve into your personal soundscape with Galaxy AI-assisted Adaptive EQ/Adaptive ANC. Based on individual ear shape and wearing habits, our AI-boosted algorithm analyzes sound detected through the inner and outer mics in real-time. Then, Galaxy AI

optimizes your listening experience by adjusting the sound to conform to your fit with pinpoint precision. Images simulated for illustrative purposes. ANC(Active Noise Canceling) is off by default.

- **ANC lets you hear in the clear** Take the guesswork out of sound setting with ANC. Whether you're enjoying the latest shows, on a call with your bestie or listening to your playlist, listen with the right adjustments wherever you go. Images simulated for illustrative purposes. ANC(Active Noise Canceling) is off by default.
- **Overcome language barriers in seconds** With Galaxy AI, understand the world like never before. See the translation on your Samsung Galaxy smartphone, and simultaneously hear your conversation interpreted in real-time through your Galaxy Buds3. Discover what it means to be truly free of language barriers. To access listening mode, simply pinch and hold your earbuds and your Galaxy Buds3 will continue to interpret as the speaker is talking. Once the app is open, the Interpreter feature will start up with the mode last used. Devices sold separately. Images simulated for illustrative purposes. Sequences shortened and simulated. Actual UI may be different. Audio interpretation is only available when wearing Galaxy Buds and connected to a Samsung Galaxy smartphone. Interpreter feature is not directly provided by Galaxy Buds themselves. If Galaxy Buds are unavailable, the interpreted content is provided on the screen of your Samsung Galaxy smartphone. Interpreter requires Samsung Account login. Certain languages may require language pack download. Service availability may vary by language. Accuracy of results is not guaranteed. Availability and supported features may vary by country, region or carrier. Availability of supported languages may vary. Samsung Galaxy devices may require the latest software update to properly support Galaxy AI features. Galaxy AI features are supported on Galaxy S24 series, Galaxy S23 series, Galaxy Z Fold5, Galaxy Z Flip5, Galaxy S23 FE, Galaxy S22 series, Galaxy Z Fold4 series and Galaxy Z Flip4 series as of May 2024. The default setting of the Pinch and Hold gesture is set to Noise Control. In order to change the Interpreter Mode, the settings must be configured directly in the phone settings for devices running One UI 8.0 and later. For devices running on earlier versions of One UI, configurations can be found in the Galaxy Wearable app.
- **Super Clear Call, as if you are near** Looking for smooth, reliable, high-quality calls? Galaxy Buds3 offers highly-improved call quality through enhanced machine learning and super wideband technology. The elaborately trained machine learning model analyzes ambient noise and the user's voice patterns. Then it selectively removes unnecessary noise and improves call quality, ensuring your voice is heard — even in noisy environments. Enhance your conversations with rich, lifelike clarity through super wideband calls — double the voice bandwidth of conventional Bluetooth calls. Images simulated for illustrative purposes. Super wideband call is available only when paired with Galaxy Z Fold6, Galaxy Z Flip6 with One UI 6.1.1 or above. Additional devices may be supported in the future. Super Wideband (SWB) is available regardless of the Call App. SWB may not be supported depending on the mobile network between devices.
- **TV 360 Audio puts you front and center** Dive into a spatial sound experience. 360 Audio is a feature that identifies the exact direction of the sound as you tilt your head, providing surround sound for a more vivid listening and viewing experience. Images simulated for illustrative purposes. 360 Audio is only available on Samsung Galaxy smartphones and Galaxy Tab devices with Android One UI version 3.1 or later, and selected Samsung TV models. Supported Samsung TV models include: Neo QLED 8K (QN900D, QN800D), Neo QLED 4K (QN95D, QN90D, QN87D, QN85D) OLED (S95D, S90D, S85D), QLED (Q80D, Q70D). Support for 360 Audio and head tracking may vary depending on the application and content. Support for specific models may be updated in the future. Direct Multi-channel is available on Samsung Galaxy smartphones and Galaxy Tab devices with Android One UI version 4.1.1 or later. The TV

360 Audio feature is not supported as of July 2024 for Galaxy Buds3 and Galaxy Buds3 Pro models, but is expected to be available in a feature update.

- **Swap devices without missing a beat through PC Auto Switch** PC Auto Switch on Galaxy Buds3 detects audio activity and transfers the connection to your favorite Samsung Galaxy devices, so you can work and play seamlessly. Images simulated for illustrative purposes. Sequences shortened and simulated. Actual UI may be different. Auto Switch feature is only available on Samsung Galaxy Book series with One UI 6.0 or later, Samsung Galaxy smartphones and Galaxy Tab devices with One UI 4.1.1 or later and Galaxy Watch4 series or later. Samsung Galaxy devices must be logged in to Samsung Account to enable the Auto Switch feature. Auto Switch feature for Samsung TV is only available on Samsung TVs launched Feb '22 or later after getting a firmware update from Jul '22. Auto Switch with TV is only available for making and receiving phone calls.
- **Personalize your sound via quick settings panel** Fine-tune your audio straight from the quick settings panel. Just swipe down from the top of the screen, touch and hold the volume slider or Buds icon and adjust noise control and sound settings. Best of all, your preferred sound settings are now saved for each app. Simply adjust them in the quick settings panel while the app is playing media. Whether you enjoy 360 Audio on YouTube or prefer bass boost equalizer on Spotify, your audio is always tuned just the way you like it. Video simulated for illustrative purposes. Actual UX, UI may be different. Availability of functions may vary by country, language, device model, apps. Some functional widgets may require a network connection and/or Samsung Account login. Available on Samsung Galaxy devices with One UI 7.0 or above. Additional devices may be supported in the future.
- **Share your sound with those around via Auracast** With Auracast broadcast technology, share your audio stream with an unlimited number of devices. Effortlessly transform your Samsung TV, Samsung Galaxy smartphone or tablet into a radio source to start engaging with others. Images simulated for illustrative purposes. Sequences shortened and simulated. Actual UI may be different. Devices with Auracast Source ability are available only on Samsung Galaxy smartphones, tablets with Android One UI version 6.1 or later, and select TV models. Supported Galaxy smartphone and tablet models include: S24+, S24, S24 Ultra, Galaxy Z Flip5, Galaxy Z Fold5, S23+, S23 (except FE edition), S23 Ultra, Tab S9+, Tab S9+ 5G, Tab S9, Tab S9 Ultra, Tab S9 Ultra 5G, Tab S9 FE+, Tab S9 FE+ 5G, Tab S9 FE, Tab S9 FE 5G and Tab S9 5G. Supported TV models include: 2024 NeoQLED 8K QND800, QND900, 2023 Neo QLED 8K and 2023 MICRO LED models. Devices with Auracast Assistant ability are available only on Samsung Galaxy smartphones, tablets with Android One UI version 5.1.1 or later. Supported Galaxy smartphone and tablet models include: S24+, S24, S24 Ultra, S23+, S23, S23 Ultra, Z Fold5, Z Flip5, Z Fold4, Z Flip4, A54 5G, A55 5G, M54 5G, Tab S9+, Tab S9+ 5G, Tab S9, Tab S9 Ultra, Tab S9 Ultra 5G, Tab S9 FE+, Tab S9 FE+ 5G, Tab S9 FE, Tab S9 FE 5G, Tab S9 5G and Tab Active 5G. Connecting 2 or more devices to Auracast is limited to Samsung Galaxy devices. The quality of the Auracast audio stream may vary depending on the application, network connection and other factors.
- **Just say the command - done** Control your audio settings without needing to touch your phone. Simply say a command, such as "next song" or "volume up" and let Galaxy Buds3 do the rest. Feature availability may vary by language, country or region. Images simulated for illustrative purposes. Sequences shortened and simulated. Actual UI may be different. Devices sold separately. The Voice Command menu appears when the language pack matching the system language exists. Voice Command is limited to fixed commands and is only available in Korean, English (India, United Kingdom, United States), Portuguese (Brazil), Chinese, German, Spanish (Mexico, Spain), Italian and Polish at the time of release. The initial language for commands follows the system language setting, and can be

altered in the phone settings for devices running One UI 8.0 and later. For devices running on earlier versions of One UI, configurations can be found in the Galaxy Wearable app. Additional language packs may be supported in the future.

- **Seek your serene sound space** Mindfulness comes with daily practice. At the press of a button, teleport to a worry-free world of your own with Samsung Health powered by Calm. Alleviate stress with peaceful melodies from nature, improve your focus with white noise or relax with ASMR content for a happier, healthier you. Images simulated for illustrative purposes. Sequences shortened and simulated. Actual UI may be different. Devices sold separately. Some content may incur additional charges. Samsung Account log in is required for Samsung Health. Mindfulness feature settings can be configured directly in the phone settings for devices running One UI 8.0 and later. For devices running on earlier versions of One UI, configurations can be found in the Galaxy Wearable app. The Samsung Health app needs to be downloaded in order to use the Mindfulness feature. Service availability may vary by country or region.
- **Enjoy the seamless experience across Android smartphones** Start your Galaxy Wearable experience on your Android smartphone. Pair your Galaxy Watch, Buds or Ring easily with the Android phone you already have. Just download the Galaxy Wearable and Samsung Health apps on Google Play, and you're good to go. You can even try out different watch faces on the Galaxy Wearable app—mix and match various features to your liking. Galaxy Watch7, Galaxy Watch Ultra and Galaxy Ring must be paired with a smartphone with Android 11.0 or above and minimum 1.5GB Memory. Connecting Samsung Galaxy Buds as Bluetooth Audio is available regardless of the OS. For devices running One UI 8.0 and later, settings can be configured directly in the phone settings. For devices running on earlier versions of One UI, configurations can be found in the Galaxy Wearable app. Additionally, to use the Galaxy Wearable app, Samsung Galaxy Buds must be paired with a smartphone running Android 11.0 or above with at least 1.5 GB of memory. Advanced settings on the Galaxy Wearable app include Noise Control, Adaptive EQ, Pinch Control and software update. Some features are only available on selected Samsung Galaxy smartphones. Galaxy Wearable app is not supported on iOS. Samsung Health Monitor app is only available on Samsung Galaxy smartphones. Gesture and Find My Ring features are only available on Samsung Galaxy smartphones. Suggested Replies feature on Galaxy Watch7 and Galaxy Watch Ultra is only available on Samsung Galaxy smartphones. Availability and supported features may vary by country, region or carrier. Android is a trademark of Google LLC.
- **All in harmony** Keep your music and audio flowing, whenever and wherever you're going. Wireless Charging Support. With ANC on/off, earbuds and case provide up to 30 hours of play time on a full charge. Based on internal testing. Play time tested by pairing a pre-production Galaxy Buds3 to a recently released Galaxy smartphone with default settings. Actual battery life may vary and depend on usage conditions, settings, number of times charged, Bluetooth signal strength, and other factors. 'Play time' refers to when the Galaxy Buds3 are connected to the phone, streaming music. Actual Play time may vary based on settings. IP57 is based on laboratory test conditions for submersion in up to 1 meter of fresh water for up to 30 minutes. Not advised for beach or pool use. Charging case is not water resistant. If the earbuds are damaged, they are not guaranteed to be water resistant. If the earbuds or your hands are wet, they must be dried thoroughly prior to handling or placing into the charging case. If placed into the charging case without drying, the earbuds may be damaged. Provided charging case is to charge the Galaxy Buds3. the Galaxy Wearable application can only be downloaded on smartphones with Android 10.0 or above and minimum 1.5GB Memory.

Specifications

Overview

- **Bluetooth Version:** Bluetooth v5.4
- **Sensors:** Accelerometer, Gyro Sensor, Hall Sensor, Pressure Sensor, Proximity Sensor, Touch Sensor, VPU(Voice Pickup Unit)
- **Earbud Weight G:** 4.7

Audio And Video

- **Number Of Mic:** 6
- **Speaker:** 1-way
- **Ambient Sound:** No
- **Active Noise Cancellation:** Yes
- **360 Audio:** Yes
- **Audio Codec:** AAC, SBC, SSC(Samsung Seamless Codec), SSC-UHQ
- **Adaptive Eq:** Yes
- **Adaptive Anc:** Yes
- **Super Wide Band:** Yes

Connectivity

- **Bluetooth Version:** Bluetooth v5.4
- **Bluetooth Profiles:** A2DP, AVRCP, HFP, PBP, TMAP
- **Le Audio:** Yes
- **Auto Switch:** Yes

Sensors

- **Sensor List:** Accelerometer, Gyro Sensor, Hall Sensor, Pressure Sensor, Proximity Sensor, Touch Sensor, VPU(Voice Pickup Unit)

Physical Specification

- **Earbud Dimension Hxwx d Mm:** 18.1 x 20.4 x 31.9
- **Earbud Weight G:** 4.7
- **Case Dimension Hxwx d Mm:** 48.7 x 58.9 x 24.4
- **Case Weight G:** 46.5
- **Durability:** IP57

Usage Time Anc On

- **Talk Time Hours Anc On:** Up to 3.5
- **Total Talk Time Hours Anc On:** Up to 18
- **Music Play Time Hours Anc On:** Up to 5
- **Total Music Play Time Hours Anc On:** Up to 24

Usage Time Anc Off

- **Talk Time Hours Anc Off:** Up to 4
- **Total Talk Time Hours Anc Off:** Up to 20
- **Music Play Time Hours Anc Off:** Up to 6

- **Total Music Play Time Hours And Off:** Up to 30

Battery

- **Earbud Battery Capacity Mah Typical:** 48.0
- **Case Battery Capacity Mah Typical:** 515

Services And Applications

- **Samsung Find:** Yes
- **Bixby Voice Wake Up:** Yes
- **Neck Stretch Reminder:** Yes
- **Voice Command:** Yes
- **Sar Information:** 2.1

Reviews

1. Very Perfect work In Samsung galaxy Buds 3 I love samsung ♡ (4 stars, posted a year ago)
2. Great sound but worst fit ever. They dont fit in my ears at all Buds 3 (2 stars, posted 10 months ago)
3. An absolutely garbage product that is not worth the money. Buy something off Temu and I guarantee it will cost you less and still last longer than this poor excuse of a product from a supposedly-reputable brand. Charging issues (where one of the buds will refuse to charge fully or at all) are a constant issue, and the case seems to be so sensitive that it will refuse to charge if you look at it the wrong way. This is a replacement pair that Samsung gave me after the original pair I bought turned out to have manufacturing issues, and less than six months later, the case has stopped charging the earbuds completely. DO NOT BUY THIS PRODUCT. (1 stars, posted 11 months ago)
4. The Buds Pro 3 are a complete disappointment. They worked fine for just four months before one earbud suddenly stopped charging and no longer connects with the Samsung Wear app. I've already tried resetting them, and for the record, I have never dropped or mishandled them. This is one of the poorest-quality products Samsung has put out, well below the standard you'd expect. Utter waste of money — utterly frustrating and disappointing. (1 stars, posted 8 months ago)
5. I recently bought the Galaxy Buds 3 and, unfortunately, I'm quite disappointed with the fit. These earbuds just don't stay put in my ears even with minimal movement, they start slipping out. They're definitely not suitable for walking or any kind of activity. I really like the sound quality and design, but the poor fit makes them hard to use. Is there any way to exchange them for the Galaxy Buds 3 Pro instead? I've heard those have a more secure in-ear design. (3 stars, posted 6 months ago)
6. I'm suprised by the reviews I'm reading. It leaves an impression that I may have received a fake product. The buds poorly fit in my ears without the silicon tip, always feeling like they would drop, hence I keep pushing them in resulting in mild pain in the ears. I couldn't feel a distinct difference with the noise canceling. Whether on or off, I still hear the sorrounding noise and conversations unlike the buds2. (1 stars, posted a year ago)
7. 1. Ear buds direction within the case is opposite to ear direction, which lead to turn it in hand before putting in ear, and due to the slippery material, this increases the possibility of faling off.

2. Ear buds is not suitable for all ears shaps and shall come with rubber accessory to enhance this issue or at least accessory to be available to buy as buds accessory. (2 stars, posted a year ago)
8. Bus3 is not good I always feel pain in my ears, all the features is not work 🗨️ (1 stars, posted a year ago)
