

Wall-mount Air-Conditioner Digital Inverter 11,260 BTU/Hr

Price: Rs. 213,999.00

Features

Designed to cool faster, wider & farther (Fast Cooling)

Cool rooms quickly from corner to corner, so you're always comfortable. Digital Inverter Boost technology cools the air 43% faster*. Its advanced design also has a 15% larger fan, 18% wider inlet and a 31% wider blade. So cool air is dispersed farther and wider**, reaching up to 15 meters.

Reduces noise and energy use by 73%* (Digital Inverter Boost)

Save money every day with highly energy-efficient Digital Inverter Boost technology. It maintains the desired temperature with less fluctuation. It also has neodymium magnets and a Twin Tube Muffler, so it works efficiently, quietly and lasts much longer. And it reduces energy usage by up to 73%*.

Simply cleans itself – automatically (Auto Clean)

When the air conditioner is turned off the Auto Clean function automatically runs a fan to remove dust and moisture in the heat exchanger. So it stays clean and dry, which prevents the growth of bacteria and mildew.

Easy to clean anti-bacterial filter (Easy Filter Plus)

Keep your air conditioner working efficiently with less effort. The Easy Filter Plus is located outside, on the top, so it can easily be taken out and cleaned. Its dense mesh keeps the Heat Exchanger clean and an anti-bacterial coating helps protect you against dangerous airborne contaminants*.

Better Heat Exchanger performance (DuraFin™)

Enhance the performance and efficiency of the Heat Exchanger using the DuraFin. It is made of a much denser material and is thicker in design. Its improved coating also has more corrosion resistance. So it passes the accelerated Sea Water Acetic Acid Test (SWAAT) for corrosion over 100 days*.

Prevents corrosion for lasting cooling (DuraFin™ Plus)

Stay comfortably cool for much longer. The Ocean Fin is made of corrosion-resistant material to protect the condenser from rusting, which helps to maintain the optimal performance of the Heat Exchanger. Its superb corrosion-resistance was proven using the Salt Spray Test (SST) for 480 hours*.

Stable and durable in harsh conditions (Triple Protector Plus)

Enjoy a long-lasting performance in challenging environments. Triple Protector Plus technology prevents damage from power surges and fluctuating electrical currents, without a separate voltage stabilizer*. Its anti-corrosion coating also protects the condenser and cabinet in harsh conditions.

Environmentally friendly refrigerant (R32 Refrigerant)

Protect the planet by reducing the impact of climate change. The air conditioner uses the next generation R32 refrigerant, which helps conserve the ozone layer and has a low impact on global warming compared to conventional R22 or R410A refrigerants. So it's much more environmentally friendly*

Saves energy & money, cools effectively (ECO Mode)

Save energy, but still stay cool. ECO mode uses less compressor capacity compared to Normal mode, which reduces energy consumption*. It lets you cool more efficiently when it's not too hot outside or just save energy and money at any time, so you don't have to worry about the electricity bills

Sleep much better throughout the night (Good Sleep)

Good Sleep mode creates the desirable climate for a good night's sleep. With its temperature control, it keeps you comfortable, so you fall asleep fast, sleep deeply, and wake up refreshed.
