Features

AI Auto Cooling

Experience an intelligent way of living with AI Auto Cooling*. It automatically optimizes the various modes by analyzing the room conditions and usage patterns**. Based on your preferred temperature, it automatically switches to the most appropriate mode to maintain the optimal conditions.

Digital Inverter Boost

Save money every day with highly energy-efficient Digital Inverter Boost technology. It maintains the desired temperature with less fluctuation. It also has neodymium magnets and a Twin Tube Muffler, so it works efficiently, quietly and lasts much longer. And it reduces energy usage by up to 73%*.

Fast Cooling

Cool rooms quickly from corner to corner, so you're always comfortable. Digital Inverter Boost technology cools the air 43% faster*. Its advanced design also has a 15% larger fan, 18% wider inlet and a 31% wider blade. So cool air is dispersed farther and wider**, reaching up to 15 meters.

SmartThings

Control the temperature in your home anytime and anywhere. Using the SmartThings App* you can remotely control and monitor the air conditioner with just a touch. Or simply tell artificial intelligence (AI) system* what you want** and it does it. It even suggests the best settings.

Auto Clean

When the air conditioner is turned off the Auto Clean function automatically runs a fan to remove dust and moisture in the heat exchanger. So it stays clean and dry, which prevents the growth of bacteria and mildew

Easy Filter Plus

Keep your air conditioner working efficiently with less effort. The Easy Filter Plus is located outside, on the top, so it can easily be taken out and cleaned. Its dense mesh keeps the Heat Exchanger clean and an anti-bacterial coating helps protect you against dangerous airborne contaminants*.

DuraFin™ Plus

Stay comfortably cool for much longer. The DuraFin™ Plus is made of corrosion-resistant material to protect the condenser from rusting, which helps to maintain the optimal performance of the Heat Exchanger. Its superb corrosion-resistance was proven using the Salt Spray Test (SST) for 480 hours*.

Triple Protector Plus

Enjoy a long-lasting performance in challenging environments. Triple Protector Plus technology prevents damage from power surges and fluctuating electrical currents. Its anti-corrosion coating also protects the condenser and cabinet in harsh conditions.

ECO Mode

Save energy, but still stay cool. ECO mode uses less compressor capacity compared to Normal mode, which reduces energy consumption*. It lets you cool more efficiently when it's not too hot outside or just save energy and money at any time, so you don't have to worry about the electricity bills.

Good Sleep

Good Sleep mode creates the desirable climate for a good night's sleep. With its temperature control, it keeps you comfortable, so you fall asleep fast, sleep deeply, and wake up refreshed

Reviews

Not good value for money. Build quality is nothing like the Samsung AC i purchased in 2019. Better build quality with better terms and conditions is available at 60% price of this AC. Even the app is different and no where near as good as the previous one. Samsung is really evolving backwards. (1 star, Posted 3 years ago)
