

Wall-mount Air-Conditioner WindFree 18,000 BTU/Hr

Price: 249,999.00

Features

AI Fast & Comfort Cooling

After Fast Cooling lowers the room temperature quickly, AI* analyzes the indoor and outdoor environments to switch to WindFree Cooling according to the user's preference. AI learns consumers' usage patterns** and spaces to cool them quickly and coolly.

AI Energy Mode

By using AI to analyze your usage patterns and external conditions, it prevents sudden stops or increases in the compressor's frequency, reducing energy use by up to 30%.*

Comfort Drying

Enjoy comfortable dehumidification without feeling cold. It maintains the desired temperature while also keeping you in the "Humidity Comfort Zone" with a humidity level of between 40% to 60%. By only creating sufficient cold air for dehumidifying it reduces energy use by 30%*.

WindFree™ Comfort Cooling

Stay cool without feeling cold draft using WindFree™ Cooling. An advanced air flow structure gently and evenly disperses air through 23,000 micro air holes covering the entire front panel. It creates a "Still Air" environment* with a very low air speed, so there is no unpleasant feeling of cold wind.

WindFree™ Wearable Good Sleep

Enjoy a good night's sleep. A WindFree™ Wearable Good Sleep mode links to wearable smart devices*, like the Galaxy Watch. If they detect that you are asleep, it automatically turns on WindFree™ Cooling and adjusts the cooling performance to create the ideal climate for a deep and pleasant sleep.

WindFree™ Energy Saving

Save energy and still stay comfortably cool. WindFree™ mode reduces unnecessary energy consumption, as it doesn't have to keep blowing powerful blasts of cold air like a Normal cooling operation. So, it consumes 77% less energy than Fast Cooling mode*.

WindFree™ Low Noise

Feel comfortably cool without disturbing your daily life. WindFree™ air conditioners gently and uniformly disperse air through thousands of micro air holes covering the entire front panel. The resulting very low air speed generates less air friction and noise* compared to Normal cooling.

AI Energy Mode

AI analyzes your usage patterns and external conditions, and reduces the air conditioner's energy use. It controls the compressor's frequency, reducing energy consumption by up to 30%*. And AI Energy mode can save energy by switching devices to Energy Saving mode at a pre-set threshold.

Comfort Drying for Cold-free Dehumidification

Enjoy comfortable dehumidification without feeling cold. Dry Comfort mode jointly analyzes the temperature and humidity using a sensor and dehumidifies without overcooling by using fine-tuning technology to control the refrigerant flow rate. So it is ideal when sleeping or in the rainy season.

Comfort Drying for Energy Saving

Save energy dehumidifying. Dry Comfort mode just cools part of the Heat Exchanger, and only creates the amount of cold air needed for dehumidification. By only using the Heat Exchanger and compressor as much as necessary, it reduces energy use by more than 30%* compared to conventional systems.

Humidity Comfort Zone

Maintain the desired temperature without being uncomfortably dry. Dry Comfort mode controls the temperature and humidity to maintain a comfortable humidity of 40-60% without it feeling cold or your respiratory organs and skin drying out. And you can monitor the humidity on the SmartThings App*.

AI Digital Inverter Control

Cool quickly, quietly and efficiently. Using AI it analyzes your usage patterns and the external conditions, and senses the air conditioner's operating status. It then precisely controls the compressor's operating frequency* to maintain the preferred temperature and reduce energy consumption.

Fast Cooling

Cool rooms rapidly. The twin compressor works stably at any speed, as its two cylinders rotate alternately. The BLDC motor's Neodymium magnets are 3x stronger than normal, which generates powerful and rapid rotation. So it cools the air 43% faster* and disperses cool air

Energy Saving

Save energy but stay comfortably cool with highly energy-efficient Digital Inverter Boost technology. It maintains the desired temperature without frequently turning off and on, so there is less fluctuation. And it enhances its power usage when cooling, which reduces energy use by up to 73%.

Fast Heating

Heat rooms rapidly from corner to corner, so you are feel comfortable whenever you want and wherever you are. When activated, the Fast Heating mode quickly distributes warm air across an entire room. Its unique design means it reaches the desired temperature faster than conventional models.

Low Noise

Cool your living spaces with less noise. The twin compressor creates 20 times less vibration than a single compressor. Samsung's patented Twin Tube Muffler also reduces refrigerant flow noise. And its WindFree™ operation reduces ambient noise, so there is a 40% reduction in detectable sound.

10 year Warranty

Enjoy peace of mind knowing that your air conditioner will deliver a long-lasting performance – guaranteed! Its inverter compressor is designed to work efficiently for a long time. And this is backed up by a 10 year warranty, so you can be sure that you will enjoy a hassle-free performance.

New Slim Outdoor Units

Make good use of valuable space and save energy. The volume of the slim outdoor unit has been reduced by 20% by utilizing compact core components, which also improve its energy efficiency by 20%. And its simplified exterior eliminates painting and reduces the use of screws when installing.

R32 Refrigerant

R32 refrigerant helps conserve the ozone layer and has less impact on global warming. It has zero Ozone Depletion Potential (ODP) and a lower Global Warming Potential (GWP) compared to conventional R22 or R410A refrigerants that are commonly used.

* GWP by refrigerant: R32 = 675, R22 = 1810, R410A = 2090.

Quick Remote

Control the room temperature quickly and easily on a Galaxy smartphone. When you get close to the air conditioner, a Quick Remote pops up on your phone to let you control its priority features, like on/off and start/stop. So don't need to waste time finding the actual remote control.

Map View

Monitor and control all your air conditioners wherever you are. Using Map View in the SmartThings App, you can see a 3D map of your home and smart devices. You can change settings, run preset routines and monitor the air quality, room temperature and energy consumption of your air conditioner.

SmartThings & Voice Control

Control the temperature effortlessly. Using the SmartThings App you can remotely control and monitor it with just a touch. You can also control it with your voice using a voice assistant, such as Samsung Bixby, Amazon Alexa or Google Assistant. It even suggests the best settings.

Welcome Cooling & Away Care

Use your air conditioner efficiently and effectively when you arrive home or go out. SmartThings Welcome & Away Care alerts when you get close to home and reminds you to turn on the air conditioner. And when you leave it will notify you if there is an air conditioner that is still working.

Smart Forward

Keep your air conditioner up-to-date with the latest technology and features, so it works just like the latest products. Smart Forward automatically installs new software in order to upgrade the operating system and security, enhance or add new functions and help improve the SmartThings App.

SmartThings Home Care

Take care of your air conditioner easily. SmartThings Home Care uses artificial intelligence (AI) to detect abnormal behavior, so that you can address maintenance needs without an on-site service. AI diagnosis checks its status and displays information about any issues with major components.

SmartThings Air Care

Maintain a comfortable environment in your home. SmartThings Air Care* automatically controls purifying and cooling devices, based on the outdoor and indoor air quality and the temperature and humidity in each room. So it enhances the cleanliness of your air and keeps you feeling comfortable.

SmartThings Pet Care

Care for your pets even when you are not home. SmartThings Pet Care* lets you adjust the temperature in your home to keep pets comfortable. You can turn the air conditioner on and off at a certain temperature or a set time and customize the temperature for long-haired and short-haired breeds.

Washable PM1.0 Filter

Protect yourself from inhaling bacteria and tiny particles. A washable PM1.0 Filter traps ultrafine dust and removes over 99% of certain bacteria. It works twice as fast as a PM2.5 Filter. Colored lights show the current air quality. And it is easy to wash, so it will work for a long time.

4-in-1 PM2.5 Filter

Remove fine dust, viruses, bacteria and allergens. A 4-in-1 PM2.5 Filter has a fabric that traps dust, including particles as small as PM2.5, as well as fibers and hair. It also has a filter with a copper coating that removes up to 99% of certain viruses and bacteria, allergens and PM2.5 dust.

Tri-Care Filter

Remove dust and potentially dangerous viruses and bacteria that pass through the Tri-Care Filter. It includes a high-density filter that extracts large household dust particles, fibers and animal hairs. It also has a Zeolite Coating Filter that captures fine dust and removes up to 99.9% of certain viruses and bacteria as well as 98% of allergens.

Copper Anti-bacterial Filter

Keep the air conditioner working efficiently with little effort. A Copper Anti-bacterial Filter is located outside, on the top, so it can easily be removed and cleaned. Its dense mesh keeps the Heat Exchanger clean and the copper material in the yarn helps reduce certain bacteria by up to 99%.

Freeze Wash

Keep the air conditioner clean and hygienic. Freeze Wash quickly freezes and then defrosts the Heat Exchanger. So it is washed in water, which removes dirt and contamination, including 95% of microorganisms. Finally, it dries up any moisture. And it alerts you when it is time for a clean.

3-step Auto Clean

Keep the air conditioner hygienic by doing nothing! After it has been working, an Auto Clean function automatically dries the Heat Exchanger using a 3-step process*. It removes moisture inside by blowing air for between 10 to 30 minute. So it helps prevent the buildup of bacteria and odors.

Easy Filter

Keep your air conditioner working efficiently with little effort. The Easy Filter is located outside, on the top, so it can easily be taken out and cleaned. It is made of a dense mesh, so it is very effective at capturing dust, which keeps the Heat Exchanger relatively clean.

Easy Open Panel

Keep the air conditioner clean both inside and outside. The Easy Open Panel can be quickly separated from the front of the air conditioner without any separate tools, which makes it easy to clean the interior as well as the exterior of the air conditioner.

DuraFin

Enhance the performance and efficiency of the Heat Exchanger. The DuraFin is made of a denser material and thicker in design and its improved coating has more corrosion resistance than

previous models. So it passes the accelerated Sea Water Acetic Acid Test (SWAAT) for corrosion over 100 days.

DuraFin+

Stay comfortably cool for a long time. The DuraFin+ is made of corrosion-resistant material to protect the condenser from rusting, which helps to maintain the performance and efficiency of the Heat Exchanger. Its superb corrosion-resistance was proven in a Salt Spray Test (SST) for 500 hours.

DuraFin Ultra

Protect the Heat Exchanger to maintain its performance. The DuraFin Ultra has anti-corrosive and hydrophilic layers that prevent rust from forming on the Heat Exchanger. Its superb corrosion resistance was proven in a Salt Spray Test (SST) of over 3,000 hours with no refrigerant leakage.

Triple Protector Plus

Enjoy a long-lasting performance in challenging environments. Triple Protector Plus technology prevents damage from power surges and fluctuating electrical currents, without a separate voltage stabilizer. Its anti-corrosion coating also protects the condenser and cabinet in harsh conditions.

Coated Copper Tube

Enjoy a long-lasting and consistent performance. The Heat Exchanger's coated copper tubes have 7.5x better corrosion resistance, protecting it against harmful environmental conditions, like dust and pollutants. So the indoor unit will work reliably for a long time and needs less maintenance.

Cool Even at 58°C

Stay cool in extremely hot weather. The Samsung air conditioner will continue cooling inside your home even when the outside temperature reaches up to 58°C (136°F). So you can feel comfortable all year round, even in the scorching summer heat.

Motion Detect Sensor

Cool your home efficiently if you are not there, and use up to 43% less energy. The Motion Detect Sensor detects if there is no movement and automatically switches to WindFree™ mode before entering standby. You can also set it not to blow air towards you or to follow you wherever you move.

Solarcell Remote Controller

Stay in control without having to worry about using batteries! The Samsung Solarcell Remote Controller includes a small solar panel on the back. All you need to keep it powered is the light

of the sun – or even the ambient light in a room. You can also recharge it using a C-type USB connector.

4-way Swing

Create a comfortable environment with an even temperature in every corner of a room. The 4-way Swing function lets you remotely control the air direction or automatically expels air in every direction. As well as the auto up-down swing function it also has an auto left-right swing function.

Power Volt

Stop worrying about the electrical voltage in your home. It does not matter whether you use 127V or 220V power outlets – or even both! The air conditioner has a Power Volt function and can be safely used on either voltage, without the extra time and cost of installing a voltage transformer.

Max Heat

Stay comfortably warm all year round even in extremely cold conditions. Max Heat ensures that the air conditioner provides a 100% heating performance when it is as low as -20°C outside. It will even continue working reliably and heat your home effectively in freezing temperatures of -30°C.

Auto Ampere Control+

Stay comfortable if the power supply is limited. Auto Ampere Control+ starts operating in Ampere Control mode when the electrical power is limited to ensure continuous cooling or heating. It can be remotely controlled, adjusted over 6 levels and will control all indoor units on one floor.

Ampere Control+

Stay feeling comfortable even if the strength of your power supply fluctuates. The Ampere Control+ lets you adjust the amperage usage across 6 levels to suit the power situation. So the air conditioner will provide continuous cooling or heating* when the electrical power is limited.

When using the Ampere Control+ mode, the cooling and heating performance may be weakened so that the operating current does not exceed the set current, depending on the indoor/outdoor environment.

5-step Convertible Control

Save energy, but still stay cool. The 5-step Convertible Cooling lets you adjust the compressor operation in 5 steps, from 40% to 120%, to suit your changing cooling needs, using the minimal amount of energy. You can also use it to reduce your daily energy consumption whenever you want.

The Black Edition

Give your home a real touch of style with an elegantly modern look that reflects the current trend for dark colors. “The Black Edition” finish is a deep dark color that blends in harmoniously with the luxurious dark tones of modern interiors and will look good in almost any room in your house.

Specifications

Capacity

Capacity (Cooling, Btu/hr): 18000 Btu/hr

Capacity (Heating, Btu/hr): 20450 Btu/hr

Capacity (Cooling, Min - Max, Btu/hr): 5100 - 23200 Btu/hr

Capacity (Heating, Min - Max, Btu/hr): 4000 - 25500 Btu/hr

Capacity (Cooling, kW): 5.28 kW

Capacity (Heating, kW): 5.99 kW

Capacity (Cooling, Min - Max, kW): 1.49 - 6.8 kW

Capacity (Heating, Min - Max, kW): 1.17 - 7.47 kW

Energy Efficiency

EER (Cooling, W/W): 3.24 W/W

COP (Heating, W/W): 3.42 W/W

EER (Cooling, Btu/hW): 11.04 Btu/hW

COP (Heating, Btu/hW): 11.69 Btu/hW

Noise Level

Noise Level (Indoor, High/Low, dBA): 41/28 dBA

Noise Level (Outdoor, High/Low, dBA): 51 dBA

Electrical Data

Power Source(Φ /V/Hz): 1 / 220-240 / 50

Power Consumption(Cooling, W): 1630 W

Power Consumption(Heating, W): 1750 W

Operating Current(Cooling, A): 7.2 A

Operating Current(Heating, A): 7.8 A

Physical Specification

Gross Dimension (Indoor, WxHxD, mm*mm*mm): 1115*290*375 mm

Gross Dimension (Outdoor, WxHxD, mm*mm*mm): 913*622*371 mm

Net Dimension (Indoor, WxHxD, mm*mm*mm): 1055*299*215 mm

Net Dimension (Outdoor, WxHxD, mm*mm*mm): 790*548*285 mm

Gross Weight (Indoor, kg): 13.1 kg

Gross Weight (Outdoor, kg): 33.5 kg

Net Weight (Indoor, kg): 11.4 kg

Net Weight (Outdoor, kg): 29.5 kg

Loading Quantity (20/40/40Hf t without Pipe): 80 / 168 / 198

Technical Information

Piping Length (Max, m): 30 m

Piping Height (Max, m): 15 m

SVC Valve (Liquid (ODxL)): 6.35

SVC Valve (Gas (ODxL)): 12.7

Moisture Removal (l/hr): 2.00 l/hr

Air Circulation (Cooling, m³/min): 16.60 m³/min

Refrigerant (Type): R32

Refrigerant (Charging, kg): 0.97 kg

Refrigerant (Charging, tCO₂e): 0.65 tCO₂e

Low Ambient (Cooling, °C): -10~52 °C

Low Ambient (Heating, °C): -15~24 °C

Outdoor Unit (Compressor Type): BLDC

Outdoor Unit (Anti-Corrosion Fin): Yes

Air Flow

WindFree Cooling: Yes

Air Direction Control (Up/Down): Auto

Air Direction Control (Left/Right): Auto

Air Flow Control Step (Cool/Fan): 5/4

Air Purification

PM 1.0 Filter: No

Tri Care Filter: No

4-in-1 Care Filter: No

Easy Filter Plus (Anti-Bacteria): No

Copper Anti-bacterial Filter: Yes

Auto Clean (Self Cleaning): Yes

Convenience
