Dimensions

Width 600 mm

Height 850 mm

Depth 595 mm

Capacity

9kg

Features

Bubble Soak

hygiene Steam

AI Ecobubble

In sync with SmartThing

Smart energy savings (SmartThings AI Energy mode)

Monitor and reduce energy use. AI Energy Mode lets you check the power consumption and estimates your bill. For courses that operate in AI Energy Mode it reduces energy use by up to 70% by using Samsung's Ecobubble™ technology to wash at lower temperatures and adjusting the cycle time.

Available on Android and iOS devices. A Wi-Fi connection and a Samsung account are required.

Can be applied when the selected washing temperature is 20~40°C. Maximum saving from running at 20 degrees instead of 40 degrees.

Based on internal testing on the WW11BB944AGB model in normal usage conditions.

Results: Power consumption without AI Energy Mode = 0.539 KWh. Power consumption with AI Energy Mode = 0.145 KWh. Results may vary depending on the actual usage conditions.

Wash for less (A-10% Extra Energy Efficiency)

Wash clothes using less energy. The Samsung washing machine is highly energy efficient and even exceeds the minimum energy efficiency requirements for the Class A rating by up to 10%. Advanced technologies enhance the washing performance and reduce the wash time, which reduces its energy use.

Based on Samsung internal testing. The WW5000D series models are 10% more efficient than required to achieve the Class A energy efficiency rating under Regulation (EU) No 2019/2014. Results may vary depending on the usage environment.

Smart, gentle washing (AI Ecobubble™)

Enjoy effective washing with AI Ecobubble™. It creates bubbles that remove 24% more soil even in cool water. It also detects the fabric type and adjusts the amount of bubbles, washing time, temperature and spin speed. So it saves up to 70% energy compared to washing in warm water and ensures 45.5% better fabric care.

AI Ecobubble™ is only activated when specific courses are selected, including Cotton, Synthetics and AI Wash with loads less than 2kg.

Based on the Performance Lab Test report by Springboard Engineering on EMPA strips, comparing a normal detergent solution and bubble technology without mechanical action. Individual results may vary.

Compared to washing in warm water. Tested in accordance with IEC 60456-2010 / 4kg Wash Load / Super Eco Wash cold (WF80F5E5U4W) vs. Cotton 40°C without Ecobubble™ (WF0702WKU). Individual results may vary.

Based on an EMPA test on a 9kg model (WF906U4SAGD, Synthetics), with and without Ecobubble™. Data collected from individual tests. Actual results may vary depending on individual use.

Performance

Wash in 39 minutes (Super Speed)

Cut your daily laundry time and get clothes thoroughly clean. Use Super Speed to wash a load in just 39 minutes. QuickDrive™ saves time by moving clothes dynamically, while Ecobubble™ ensures powerful cleaning. The rinsing time is shortened using Speed Spray and it accelerates the spin speed.

Based on using Super Speed at the default settings with a 5kg load.

Reduces microplastic (Less Microfiber cycle)

The Less Microfiber cycle works to make clothes shed less microplastics, which are discharged into the drain water. By adjusting the motor's revolution speed and washing intensiveness, the Less Microfiber cycle reduces the amount of microfiber released into the drain water by up to 54%.

More space inside (SpaceMax™)

Wash large loads with a huge 11kg capacity interior in a 600mm depth cabinet. SpaceMax™ technology creates more space inside to incorporate a larger drum without increasing the external dimensions. So your washer will fit in easily and you can wash many clothes at once, including big items.

Only available in the 11kg capacity models

Intensive cleaning (Bubble Soak)

Get your clothes spotlessly clean, even if they are really dirty. The Bubble Soak function helps remove a wide variety of stubborn stains, like blood, tea, wine, make-up and grass. Clothes are thoroughly soaked in active bubbles, so dirt and stains are loosened and can be removed effectively.

Do the smart things at home

Connect your life with SmartThings (Wi-Fi Embedded)

Use your washer easily and effectively with the SmartThings App, which enhances your washing. The Laundry Recipe recommends the appropriate wash cycle for each load. The Laundry Planner enhances your daily schedule. And Auto Cycle Link selects an optimal drying course after a wash.

SmartThings Energy (Efficient energy use. Smart savings.)

Manage your household's energy use anytime. SmartThings Energy provides helpful energy efficiency tips. It also lets you monitor the energy consumption of smart appliances in real time and compare it to the previous month.

SmartThings Home care (Smart maintenance. Easy upkeep.)

Take care of your washer easily. SmartThings Home Care notifies you when parts need replacing and helps troubleshoot problems. It also shows you how to update the software of services and devices.

Hygiene

Reduce bacteria (Hygiene Steam)

Give clothes a deep and hygienic clean. Hygiene Steam releases steam from the bottom of the drum. It removes grime and 99.9% of certain bacteria and inactivates allergens derived from house dust mites.

Keep the washer fresh (Drum Clean +)

Keep the inside of the machine hygienically clean and fresh. Drum Clean + removes dirt and 99.9% of certain odor-causing bacteria in the drum by soaking, pulsating and spinning. A water jet and fast spinning also remove grime from the door gasket.

Cleans away residue (StayClean Drawer)

Stop wasting detergent and avoid the tedious task of cleaning the detergent drawer. The StayClean Drawer ensures that more of the detergent is washed away with a specially designed water flushing system. So there is less unsightly soap residue and the tray stays clean and hygienic.

Efficiency

Durable & efficient (Digital Inverter Technology)

Enjoy energy efficiency, less noise and a long-lasting performance. Digital Inverter Technology utilizes strong magnets for a quiet and powerful performance, but uses less energy than a Universal Motor. It also has the industry's longest durability and warranty of 10 years on the motor.

Specifications

Overview

Washing Capacity (kg): 9.0 kg

Bubble technology: Yes

Net Dimension: 600 x 850 x 595 mm

Net Weight: 65kg

Design

WiFi Embedded: Yes

App Connectivity

SmartThings App Support: Yes

Reviews

I bought the Samsung 9KG Front Loader in July, and I can confidently say it's the best purchase I've made this year. From day one, I've been impressed by how quiet, efficient, and powerful this machine is. The Ecobubble technology really delivers, clothes come out spotless even on cooler washes, saving energy without compromising on cleanliness. The Steam function is a game-changer for keeping clothes hygienically clean and fresh. I also love how it connects seamlessly to the SmartThings app. I can start, pause, or monitor cycles straight from my phone. It's modern, sleek, and feels built to last. If you're considering upgrading your washing machine, don't think twice, this is the one to get. Highly recommended! (5 stars, Posted 7 months ago)

I bought this washing machine about four months ago, and it has been an excellent purchase. My wife loves it because it performs really well, and I've noticed it runs much quieter than most other machines we've owned or seen. Overall, we're very happy with it, and I would definitely recommend it to friends and family. (4 stars, 5 months ago)
